DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: the copendency in the first sentence of the specification should be updated to include the patent number of the parent applications.

Appropriate correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 12, 13, and 15-23 of U.S. Patent No. 6,470,974. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-11 of the instant application are generally a broader recitation of claims 12, 13, and 15-23 of U.S. Patent No. 6,470,974. Claim 1 does include some subject matter that was not recited in claim 12 of U.S. Patent No. 6,470,974 but it is the opinion of the examiner that this subject matter is encompassed in the scope of claim 12 of U.S. Patent No. 6,470,974.

Art Unit: 3672

Specifically, claim 1 of the instant application includes the phrase "rotate the deflection piston" in lines 29 and 20. While this specific recitation was not included in claim 12 of U.S. Patent No. 6,470,974, lines 26-32 of the claim encompass the scope of this phrase. Claim 1 of the instant application further includes the phrase "a deflection actuator coupled to the drive shaft" in lines 20 and 21. This phrase was not included in claim 12 of U.S. Patent No. 6,470,974 however it is the opinion of the examiner that since it is claimed that the deflection actuator applies a force to the drive shaft that this indicates that the deflection actuator is coupled to the drive shaft. Therefore, the scope of claim 12 of U.S. Patent No. 6,470,974 encompasses this feature. Claim 1 of the instant application further includes new functional language in lines 25-27; it is the opinion of the examiner that this functional language is the obvious function of the deflection assembly.
